WEST A STREET REHABILITATION PROJECT

Vintage Paving Company, Inc. has been contracted with the City of Dixon to perform an asphalt concrete overlay on West A Street from Interstate 80 to Pitt School Road. The contractor has completed structural patch repairs and construction of concrete curb ramps in advance of the overlay. The asphalt concrete grinding and overlay operations will be occurring during the week of May 16th-20th. During this work there will be a need to provide modified lane configurations and one-way traffic controls. In addition, Evans Road from West A Street to Rehrmann Drive will be closed on May 18-20th. A detour will be provided using Rehrmann Drive to Pitt School Road between the hours of 7am to 6pm. The public is advised to expect delays and use alternative routes, as necessary. Emergency vehicles will have access at all times before, during, and after construction operations.

If you have any concerns about the work or planned traffic controls, please feel free to contact Jason Riley with the City Engineer/Public Works Department at (707)678-7031 ext. 311.
