CITY OF DIXON

ARTICLE XII - FOG PROGRAM
AND
ARTICLE XIII - SEWER LATERAL

Background

- SSMP adopted on April 13, 2010
- Citywide sewer line cleaning and CCTV completed in October 2013 as part of Element 4.
- Element 7- FOG Control Program required to reduce FOG discharges into the sanitary sewer system

City's Maintenance

- Video inspections every 5 years, hotspot inspections monthly, lift station maintenance quarterly, lift station inspections daily, and annual CIP projects
- BioPlugs installed in lift stations and several hot spot locations in the sewer lines to break down the FOG.
- BioPlug products provide time-released bacteria that contains no enzymes, surfactants or chemicals, making it environmentally friendly and work without attention for up to 30 days.
