Sewer System Management Plan (SSMP)

Sewer System Management Plan (SSMP)

On May 2, 2006, the State Water Resources Control Board (SWRCB) adopted Water Quality Ordinance Order No. 2006-0003, which required all public wastewater collection agencies in California, with a wastewater collection system greater than one mile in length, to be regulated under the Statewide General Waste Discharge Requirement (GWDR). The GWDR requires public wastewater agencies to develop a Sewer System Management Plan (SSMP) for their wastewater collection systems. To view the city's current SSMP click on the corresponding links below.
